The PlacementIndia Advantage

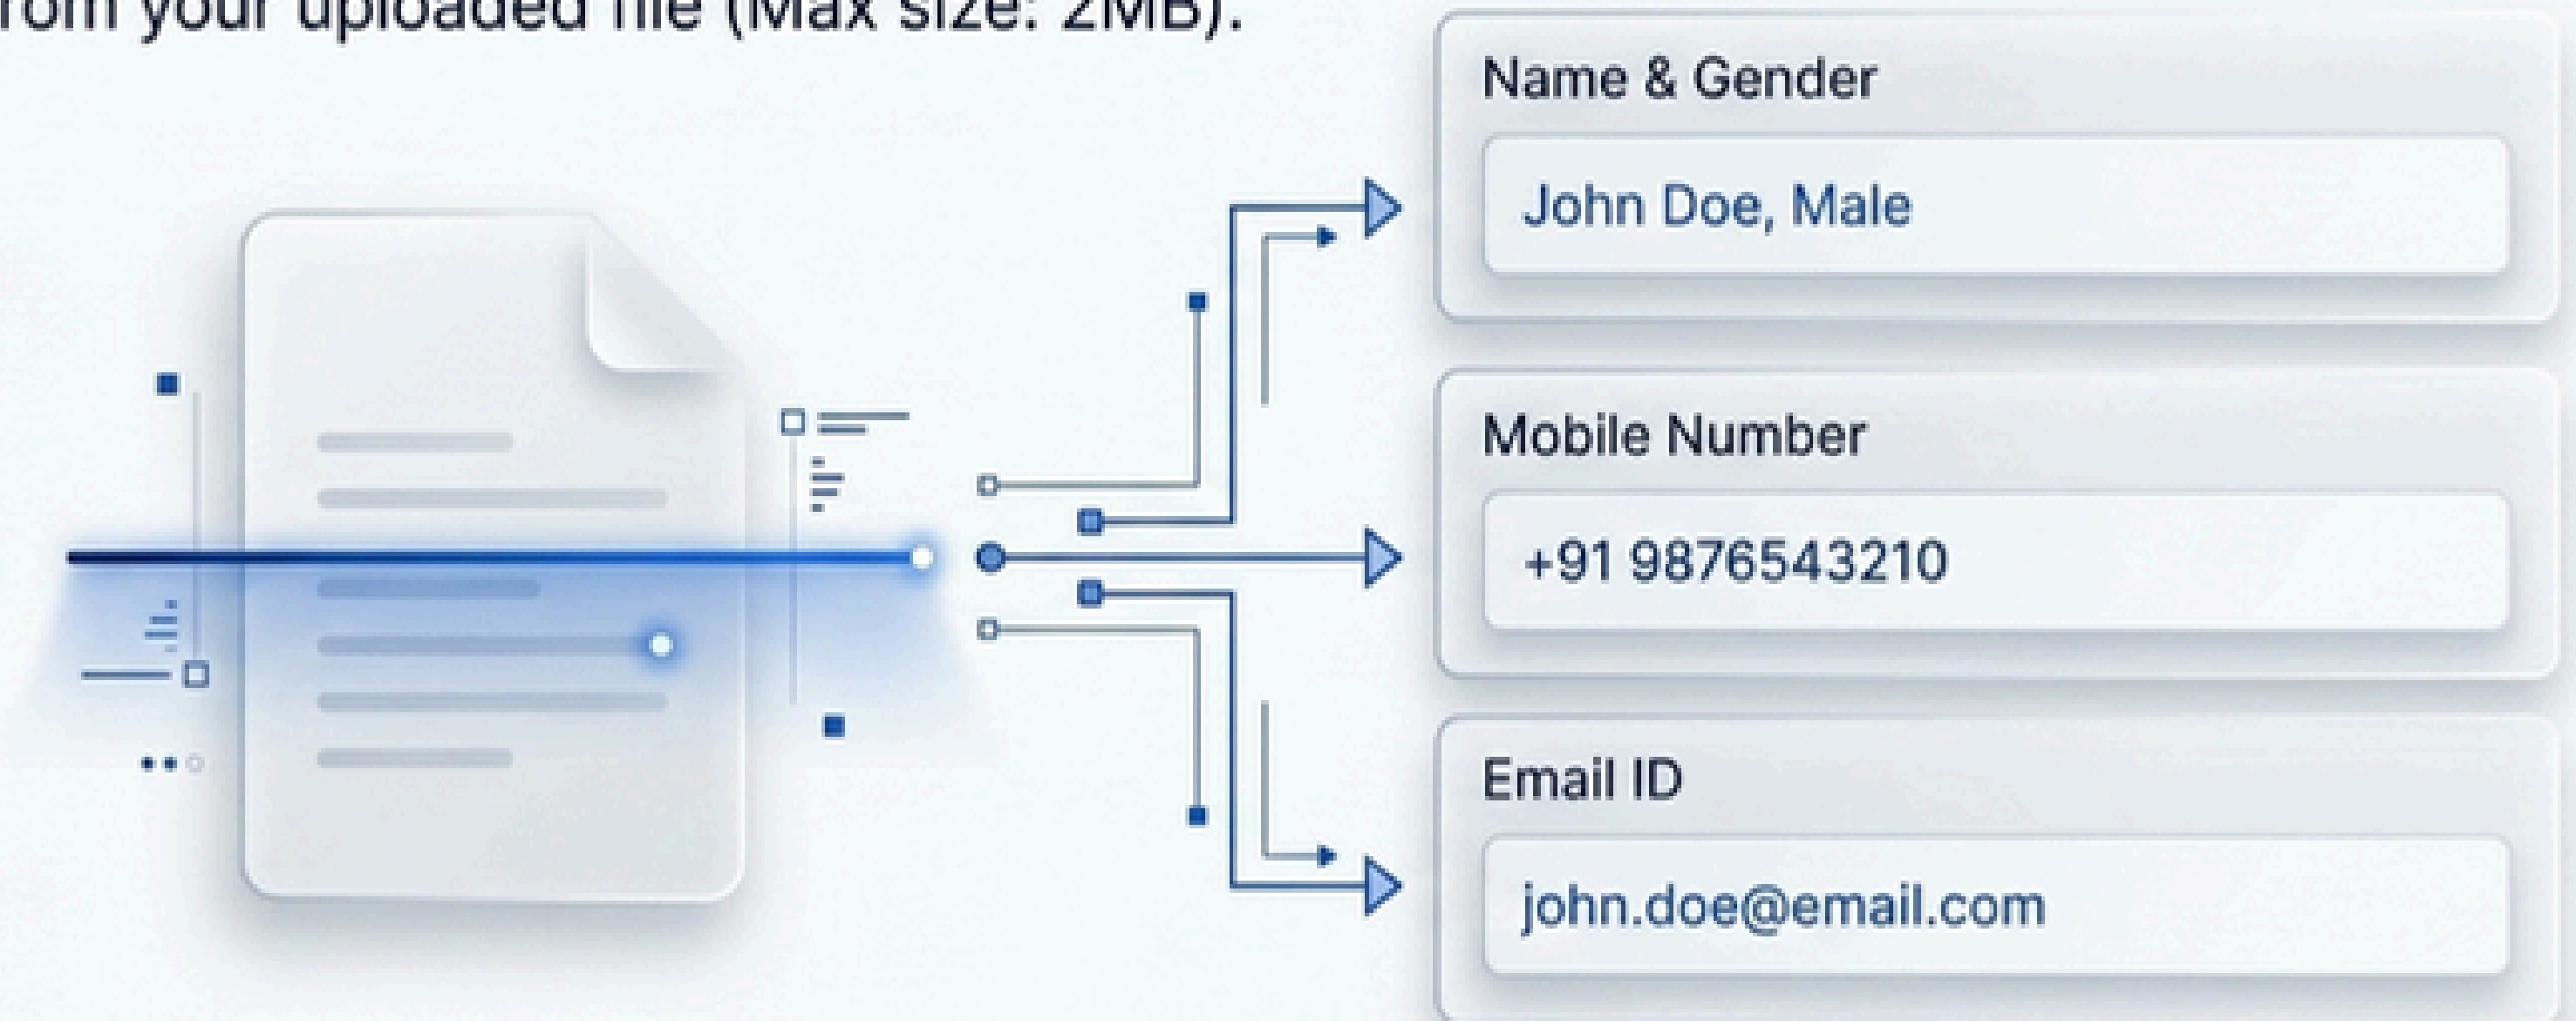

Optimize Your Approach: The CV vs. The Resume

	The CV	The Resume
Core Focus	Contains a comprehensive, detailed biography.	Provides a brief, targeted description of skills and qualifications.
Document Length	Varies widely based on the subject's entire life and career history.	Shorter, highly concise, strictly dependent on relevant experience for a specific position.

PlacementIndia.com automatically extracts details from either document type to build your master profile.
